

I live in an area controled by 2 media companies, Cumulus & Clear Channel , clearly these 2 have a monopoly over N.W.Ohio.Stale programming and advertising spots (many overlapping) are the same on each channel.Censorship too i feel exists as well .The controversy regarding the group Dixie Chicks which recieved no air play last year is a prime example. I for one would enjoy XM's entry into local programming.Its all about choice.Twenty years ago the goverment broke the telephone monopolies now look at all the choices consumers have .I have waited for years to have a service like XM its a great thing.The future is here embrace it !
